

Galaxy Garages puts innovation at work with state-of-the-art laser sensors to help maximize occupancy!

What makes Galaxy Garages your first choice?

The Finest Innovation and Excellence

- Online Reservation System
 - Pushing limits with a state-of-the-art reservation system with online billing and reminders made simple
- Laser Sensors
 - Powering what's next with the cutting-edge laser sensors, which will provide precision readings to help the Galaxy Garages system determine the amount of vacant spots in the garage and further, maximize occupancy and profit
- Quick Response Codes and Scanners
 - Empowered by innovation, Galaxy Garages will replace the traditional tickets with QR codes. Moreover, QR codes are an intelligent, secure solution that will serve as virtual tickets that can never be misplaced or lost by customers!
- Cameras and Surveillance
 - Your Security. Delivered. A greater measure of confidence at your side with the latest surveillance technology to ensure protection for you and your car!

Who We Are

About Us

As the Spring semester took course at Rutgers University, a group of young, dedicated men took on the task to create a technologically advanced system to modernize traditional parking garages. Galaxy Garages is a fully automated parking garage system that was created by Group #2. Its Group Members consist of Mehul Vora, Sajeel Ahmad, Omar Ouf, Chris Steinert, Alex Sanchez, Kerry Liu
